THE METAVERSE WOVEN TO THE FABRIC OF THE UNIVERSE

Embracing crypto without alienating
future adopters—the practical way

TABLE OF CONTENTS

ABOUT US

OUR VISION

The adoption of blockchain technology in industries and organizations such as gaming, art, legal, global institutions, and nations (El Salvador's Bitcoin adoption as National Currency) are indicating a mass adoption paradigm shift.

Blockchain as the "particle of truth" that helps in the verification and traceability of multistep transactions in a public ledger, has not only enabled revolutionary ways to earn, **but also surrendered back the autonomy to the people**. As gamers are able to live life gaming through the play-to-earn movement, digital artists are able to add another layer of monetization to their materials through NFT, and smart contracts are truly "fool-proof" agreements and memorandums, the use cases of blockchain technology are rapidly becoming adopted in the world.

However, of the 7.7 Billion people in the world, only 100M are connected to the blockchain revolution—roughly 1.29%. As early adopters of blockchain technology, such as the revolutionary projects of AXIE Infinity, we have discovered that the blockchain revolution is applicable to all industries.

So as to embrace crypto without alienating future adopters, instead of bringing the metaverse to the world, we'll bring the world to the metaverse—and we'll do that with you, one CHAIN at a time. **Introducing, 8CHAIN's virtual world.**

WE AIM TO INTEGRATE REAL WORLD INDUSTRIES TO THE METAVERSE

OUR VISION

A CONNECTED WORLD WHERE EVERYONE CELEBRATE ABUNDANCE.

OUR AMBITION

WE AIM TO TRANSFORM 888+ MILLION LIVES AND PROVIDE LIMITLESS OPPORTUNITIES TO PEOPLE.

INTRODUCTION

8CHAIN tokens are BEP-20 tokens on the Binance Smart Chain Network. 8CHAIN will launch 8 integrated projects over the course of 8 years with 8CHAIN as the governance token for all of its projects. 8CHAIN is the evolving and future-proof token that aims to create an integrated ecosystem within the crypto space.

8CHAIN holders will be able to claim rewards if they: 1.) stake their tokens, 2.) utilize the 8CHAIN projects (i.e., both in website and mobile applications), and 3.) participate in key governance votes. Once the DAO is successfully launched, 8CHAIN will be utilized as the governance token for the initial and future initiatives of the project developers. These include but are not limited to the following: Workout-to-Earn platform, NFT art collection, 8CHAIN staking, Play-to-Earn platform, other future ventures such as the CryptoEarn, High Rollers, Virtual Community, and Virtual World, both in website and mobile applications.

8CHAIN is built by a team of blockchain experts, crypto early adopters, venture developers, venture builders, developers, and builders, all united by the impact mission.

THE PROBLEM

There is a severe disconnect in the real-world activities and the digital reality. As a result, ecosystems, organizations, and stakeholders stuck in Web 1.0 and Web 2.0 are challenged in being "included" in the cryptospace (Only 0.1% of the world is in the crypto ecosystem).

Multiple ecosystems and chains are disrupted and displaced as crypto rose. As a community-oriented project, we don't want to just disrupt, we want to integrate ecosystems and provide autonomy to the community.

THE OPPORTUNITY

The state of the market has indicated a paradigm shift that blockchain technology's use cases will be installed on all forms of organizations and governance.

Bitcoin and other cryptocurrencies have emerged as a new asset class that has seen extraordinary returns over the past decade. Bitcoin has also surged vs Gold, and is now in direct close competition with trillion-dollar valuation companies such as Alphabet and Amazon—recently scaling past Tesla, Meta, and NVIDIA.

EL SALVADOR

Several new developments such as increased institutional interest, pending ETF (exchange traded fund) approval, and the popularity of stable coins suggest a continued positive trend. A future where crypto is integrated not just to business ecosystems but to financial institutions and trade inflows of nation's. El Salvador—one of the first country crypto adopters—acquired roughly $21 million worth of bitcoin on Monday, President Nayib Bukele announced, buoying the crypto market ahead of making history Tuesday by becoming the first country in the world to formally adopt the digital currency as legal tender (Forbes, 2021).

CRYPTOCURRENCY

There are over 70M cryptocurrency wallet holders; hence, market cap has more potential. Acceptance of crypto reached the highest growth curve since 2011, with the user base increasing by almost 18M in 1 year, from November 2020 (i.e., 60.36M holders) to November 2021 (i.e., 78.86M holders). Analysts show acceptance of crypto is the highest at 2021, and will continuously increase by 2022 onwards.
